

GLOWING OCEAN AND NIGHT LIFE TOURS

See **bioluminescence** in our ocean; a natural phenomenon caused by masses of microscopic algae that glow and sparkle with any movement in the water. Truly a wonderful and natural experience. Best seen by snorkeling; also visible from onboard our all-weather dive boat.

We take you at night to see this glowing ocean phenomena, your body appears to be surrounded by a vibrant, sparkling, warm, blue / green glow. All 100% natural.

*Included is a night life tour by snorkel of a rocky reef.

All water activities will be guided by our trained diver guides. Available for accomplished snorkelers and/or swimmers. Not a swimmer? Then you can stay dry and watch from the boat; but best results are from being in the water.

***2019 - 2020 summer season starts November and finishes April 2020**

\$80 each includes all equipment required, boat transfers, hot drinks and nibbles. Bring warm clothing.

Snorkelers will receive wet suit, fins, mask, snorkel, torch, bodily attached beacon and towel.

Bookings are essential. Meet at the shop at 8.30 pm and returns at 11.30 pm. We offer a free pick up and return service within the Picton CBD area. To book ring (03) 573 5939 or call into our shop on 7 Marina Drive located in the Waikawa Marina, 5 km from Picton's centre.

As these tours are watching wildlife and naturally occurring events, we rely on weather, temperature, tides, moon phase and many other requirements to make it most probable, therefore we cannot guarantee your visual experience on any one night. Our trips are however timed for the best and most likely outcome. The season is limited and often we are sold out so don't book late. See website for terms and conditions.
